

A Managed Interface SaaS Solution That Connects Everything

Managed Interfaces

POWERED BY QVΣRA

Interface Solutions for:

- > Practices
- > Ambulatory Clinics
- > Hospitals and Health Systems
- > HIE Networks
- > New Interface Development

Features and Benefits:

- > Interface Installation & Management
- > Low Monthly Subscription
- > No upfront costs
- > Interface Engine (ConnectR) Migration Services included in the Monthly Subscription
- > A True Interoperability Solution
- > Standards Compliant
- > Error Resolution Services

Platforms We Have Interfaced:

- > Allscripts
- > Cerner
- > Epic
- > GE Healthcare
- > NextGen
- > eClinicalWorks
- > Meditech
- > And most other leading EHR/PM systems

Interface Connectivity For:

- > PM/EHR Systems
- > HIS (Hospital Information Systems)
- > HIE (Health Information Exchange)
- > RIS (Radiology Information Systems)
- > PACS Systems
- > LIS (Laboratory Information Systems)
- > Custom Interfaces

Implement True Healthcare Interoperability

Our Managed Interface Solution makes healthcare interoperability a reality, today. Powered by QIE, this SaaS (Software as a Service) solution handles the installation, updates and maintenance of all your healthcare related interfaces. This advanced interface solution provides practice-wide benefits such as improved clinical workflow, reduced overhead expenses, and true systems interoperability. We connect all of your Health IT systems, so you can easily share patient data inside your practice and with other Healthcare Organizations.

Qvera Interface Engine (QIE)

SIMPLE • FLEXIBLE • FAST

"In early 2015, we made the decisions to migrate all of our interfaces from ConnectR to Qvera Interface Engine (QIE). Working closely with EHR Integration Services, we migrated most of our ConnectR interfaces in 3-months, including the addition of 2 new clinical applications. We feel like we have control of our IT strategy again!"

—John Grey
MHA IT Director – Murfreesboro Medical Group

Connect All Systems — Pay As You Grow:

Subscribing to our Managed Interface Solution immediately reduces the complexity of managing your IT environment. How? Because you no longer worry about healthcare interface implementations ever again. Our interface experts will implement any interface you can think of, to literally any other system, so your team can focus on other high-value projects.

The best part? Our "Pay As You Grow" model eliminates all up-front fees. With the Managed Interface Solution, implementing a new interface simply adjusts your monthly subscription, instead of a large upfront cost.

Permanently Solve Your Healthcare Interface Challenges

Interface Planning and Integration: Get Connected Fast

We have a proven process in place that ensures a quick and accurate implementation, with no up-front cost. Our interoperability experts consult with your HIT team to assess, plan, and implement your interfaces. Your system is set-up to protect your practice from evolving interface standards and vendor software changes. We stay on top of all data formats and standards, IHE profiles, and communication protocols because we take security, interoperability and data sharing seriously. In addition, we are up to date with HL7 FHIR so we can provide a bridge to the next generation of interface standards.

QIE - The Only Interface Engine You'll Ever Need

The QVERA Interface Engine (QIE) delivers flexibility, simplicity, and reliable performance as the new industry standard for interface engines. QIE has an intuitive visual interface allowing for rapid development and implementation. EHR Integration Services has the expertise and services to successfully deploy and integrate your new practice interface. Together, we provide the best interface solution available and the only interface engine you'll ever need.

- > **Rapid Interface Development**
- > **Works with all data formats and standards**
- > **Integrates with all IHE profiles**
- > **Compatible with all communications protocols**
- > **Provides alerting, monitoring, and error management**

Updates and Support Whenever You Need It

Client satisfaction and maintaining top-notch, consistent service is our top priority. We understand that there are many variables that can impact your interface, such as an update from your software vendor. Our team is always here to help you in the event of an unexpected issue that needs troubleshooting and resolution. Decades of experience have enabled us to proactively address problems well before they affect your practice operations.

Custom Interface Innovation Lab

When a standard interface doesn't fit your unique requirements, you can rely on us to innovate and solve your interface challenges. We offer custom interface development services for connecting EHRs, practice management software, patient portals and HIE systems. Our experience with the leading EHR systems, interface innovations and technology standards provides a strategic advantage for your custom interface projects.
