

# Instantly output patient records individually or as a batch with Chart2PDF.

## Chart2PDF

Chart2PDF is an efficient application designed to save healthcare practitioners time, money, and resources on exporting patient records. It seamlessly exports single or multiple patient charts to a PDF file and is fully integrated with NextGen® Enterprise. The primary function of Chart2PDF is to automate the time-consuming task of converting a patient chart into a single PDF for printing, storage, or electronic transfer. These files can be used for insurance and legal audits, physician and patient transfers, and Meaningful Use Compliance.

### Chart2PDF Features:

- > Customized configuration of patient charts
- > Customized cover page including practice's logo and address
- > Chart personalization features such as patient photo and identifiers
- > Single sign-on with NextGen Enterprise EHR
- > Extensive patient searching options
- > Global Document Filters
- > Pay only for what you use with our new pay-by-chart pricing model
- > Ability to save a document back to the patient's chart

> **Efficiency:** Chart2PDF has two useful workflow options available; On Demand and Batch Automation. The first allows you to create, personalize, and export a single patient chart instantly. The second allows you to select, personalize, and export multiple patient records immediately or at a later scheduled time.

> **Productivity:** Free up your staff with Chart2PDF. End preoccupation with time-consuming tasks such as printing, scanning, and creating one patient chart at a time. This application allows you to end inefficient use of staff resources on tedious administrative tasks.

> **Cost-effectiveness:** Reduce your material and labor costs associated with creating, storing, and exporting patient records. Chart2PDF is all digital and does not require significant physical resources in order to function effectively.

> **Personalization:** Patient charts can be personalized with photos and other identifiers. This allows practices to easily identify and organize patient records while adding a much-needed human touch to patient care.

> **Security and Risk Mitigation:** Chart2PDF protects sensitive patient information. All exported charts are password protected for security. Additionally, there are several reporting features available including data on application use and an audit of all extracted charts categorized by disclosure reason. You can also quickly respond to legal and insurance audits with Chart2PDF.
